What Are the Risks and What Could I Get in Return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Main risks include: **concentration risk, counterparty risk, currency risk, liquidity risk, market risk, operational risk, redemption risk, sector risk, and securities risk.** Please refer to the [Prospectus](#) and the [PRIIPS KID](#) available at www.polencapital.com for further information on risks.

This information pertains to the USD Institutional Class (ISIN: IE000WNA7YH4) and it may differ from other share classes.

For full details please refer to the Pre-Contractual Annex available on the Global Distributor [website](#), the Polen Sustainable Investment [Policy](#) and the Polen Capital Sustainable Investing Policy [Statement](#). **The decision of the investor to invest in the promoted fund should consider all the characteristics or objectives of the fund.** There is no guarantee that that ESG considerations will enhance a fund's investment strategy or performance.

An investment in the Fund concerns the acquisition of shares in the Fund and not in any underlying asset of the Fund. As a result, shares held in the Fund do not confer any interest or share in any particular part of the assets of the Fund. The value of the investment in the Fund can reduce as well as increase and, therefore, the return on the investment in the Fund will be variable. Income may fluctuate in accordance with market conditions and taxation arrangements.

*In an effort to avoid distorting aggregate portfolio characteristics, the weighted average portfolio calculations exclude an individual financial ratio that has a negative denominator or an outlier value (e.g., greater than 100x or 100%, less than 0%) which we view as not representative of the ongoing underlying economics of the business, likely due to transitory issues or GAAP accounting limitations. Additional information is available upon request.

For the avoidance of doubt the portfolio characteristics are based on the underlying assets of the Fund. This information along with all other information in the fact sheet is not intended to be construed or understood in any way to equate to the expected or projected future performance/returns of the Fund. The Investment Manager may at any time determine to divest from some or all of the holdings in the Fund and invest in other assets. The information contained in this fact sheet is not a guarantee or indication of the future performance/returns of the Fund. As a result, there is a risk of an investor losing all or part of their investment in the Fund.

Language used in the Portfolio Statistics and Characteristics sections are defined in the Disclosures under the section "Definitions." **Neither past experience nor the current situation are necessarily accurate guides to future growth in value or rate of return.** All data as of 30-11-2025 unless otherwise noted.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario USD 10,000 is invested.

What are the performance scenarios?

For more information of the different performance scenarios of the sub-fund in unfavorable, moderate, and favorable scenarios over the last 5 years, please refer to the [PRIIPs KID](#).

Please see our Global [website](#) for more information.

Costs Over Time	If you exit after 1 year	If you exit after 5 years
Total costs	USD 75	USD 613
Annual cost impact(*)	0.75%	0.82%

(*)This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 10.92% before costs and 10.10% after costs. **There are no Entry/Exist costs or Performance fees for this fund. Recommended Holding Period: 5 years.**

The costs information in this slide may not be exhaustive and the Fund may incur other expenses. For further information on costs, charges and other expenses, please refer to the Prospectus and the PRIIPs KID available at www.polencapital.com

Composition Costs	One-off costs upon entry or exit
Management, administrative or operational costs	0.70% of the value of your investment per year. This is an estimate based on actual costs over the last year
Transaction costs	0.04% of the value of your investment per year. (This is an estimate. The actual amount will vary depending on how much we buy and sell)

²KIID Ongoing Charge is as of 31 December, 2024 and may be higher or lower and where applicable, the KIID Ongoing Charge is equal to the Max Ongoing Charge because such share class has not yet launched. The ongoing charge cap excludes all portfolio transaction charges. Performance for the various share classes will be more or less depending on differences in fees and ongoing charges. Fees, charges and costs may increase or decrease as a result of currency exchange rate fluctuations.

The difference at any one time between the sale and repurchase price of share in the Fund means that the investment should be viewed as medium term to long term. Entry fees charged will lower returns. The ongoing charges figures shown here are based on expenses for the year ending 31 December, 2024. This figure may vary from year to year and the Fund's annual report for each financial year will include details on the exact charges made. It excludes all portfolio transaction charges and performance fees. Please consult the prospectus for a comprehensive explanation of all fees.

Definitions:

Annualized Performance: Annualized performance show longer term performance rescaled to a 1 year period. Annualized performance is the average return per year over the period. Actual annual figures are available to the investor on request. **Active Share:** Active share is a measure of the percentage of stock holdings in a manager's portfolio that differ from the benchmark index. **Weighted Average Market Cap:** a measure used to determine the average market capitalization of the companies in a portfolio or index—weighted by the proportion of each holding within that portfolio or index. **Polen Long Term EPS Growth Estimate:** a Polen Capital estimate of projected long-term earnings growth rates (Earnings Growth is not a measure of future performance). **Net Debt/EBITDA:** A measurement of financial leverage, calculated as a company's interest-bearing liabilities minus cash or cash equivalents, divided by its EBITDA (earnings before interest, taxes, depreciation, and amortization). The ratio can be interpreted as the number of years it would take a given company to pay off its interest-bearing debt using EBITDA as a measure of operating earnings. **P/E Forward:** denotes the weighted harmonic average of all the P/E's of the securities in the fund's portfolio. **Return on Invested Capital ex Cash:** assesses an investee company's efficiency at allocating the capital and is measured by operating profit after taxes divided by investment capital excluding cash. **Alpha:** is the excess return of an investment relative to the return of the benchmark. **Beta:** the measure of systemic risk of a portfolio in comparison to the market as a whole. **Sharpe Ratio:** a ratio of the return on an investment relative to its risk. **Information Ratio:** a measurement of portfolio returns relative to a given benchmark. **Upside Capture:** is a statistical measure of overall performance relative to a benchmark during rising markets. **Downside Capture:** is a statistical measure of overall performance relative to a benchmark during declining markets. **Standard Deviation:** measurement of the dispersion or volatility of investment returns relative to its mean or average.

The MSCI ACWI Index is a market capitalization weighted equity index that measures the performance of large and mid-cap segments across developed and emerging market countries. The index is maintained by Morgan Stanley Capital International.

The Fund is considered to be actively managed in reference to the MSCI ACWI Index (the "Benchmark") by virtue of the fact that it uses the Benchmarks for performance comparison purposes. Certain of the Fund's securities may be components of and may have similar weightings to the Benchmarks. However the Benchmarks are not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Benchmarks.

The volatility and other material characteristics of the indices referenced may be materially different from the performance achieved by an individual investor. In addition, an investor's holdings may be materially different from those within the index. Indices are unmanaged and one cannot invest directly in an index. The performance of an index does not reflect any transaction costs, management fees, or taxes.

Past performance is no indication of current or future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units.

Risk Considerations: Risk factors you should consider before investing: The value of investments and any income will fluctuate and investors may not get back the full amount invested.

The Fund's investments are concentrated in the U.S. This means the Fund may become more susceptible to fluctuations in value resulting from adverse economic or business conditions in the U.S., including legal, regulatory, and taxation changes.

Changes in exchange rates may have an adverse effect on the value, price, or income of the product. While the Company aims to ensure the accuracy of the data contained in the marketing communication, it is provided for information purposes only. It should not be relied on as the basis for making an investment decision.

Operational risk: management, business or administration processes, including those to do with the safekeeping of assets, may fail, leading to losses.

Counterparty risk: a counterparty may fail to deliver the proceeds related to the sale of securities by the Fund or in safekeeping of the securities purchased by the Fund.

Securities risk: some of the markets or exchanges on which the Fund may invest may go up and down, and the value of your investment may not increase.

The SRI represents the risk and return profile as presented in the Key Information Document (KID). The lowest category does not imply that there is no risk. The SRI is not guaranteed and may change over time.

All investments involve risks. The risk information in this document is intended to give an idea of the main risks associated with this fund. Any of these risks could negatively impact the value of the fund. Please refer to the [Prospectus](#) and [PRIIPS KID](#) available at www.polencapital.com for further information on risks.

Investors should consider the investment objectives, risks and expenses of any investment carefully before investing as described in the Company's Prospectus.
