## Notes to Financial Statements April 30, 2025

### 1. Organization and Significant Accounting Policies

The Polen U.S. High Yield Fund and Polen Opportunistic High Yield Fund (each a “Fund” and together the “Funds”) are non-diversified, open-end management investment companies registered under the Investment Company Act of 1940, as amended, (the “1940 Act”), which commenced investment operations on June 30, 2022 and July 24, 2023, respectively. The Funds are separate series of FundVantage Trust (the “Trust”) which was organized as a Delaware statutory trust on August 28, 2006. The Trust is a “series trust” authorized to issue an unlimited number of separate series or classes of shares of beneficial interest. Each series is treated as a separate entity for certain matters under the 1940 Act, and for other purposes, and a shareholder of one series is not deemed to be a shareholder of any other series. Two separate classes of shares, Investor Class and Institutional Class, are offered for the Polen U.S. High Yield Fund. The Polen Opportunistic High Yield Fund offers three separate classes of shares, Investor Class, Institutional Class and Class Y. As of April 30, 2025, Investor Class shares had not been issued on the Polen U.S. High Yield Fund. Polen Capital Credit, LLC (“Polen Credit” or the “Adviser”) serves as investment adviser to the Funds pursuant to an investment advisory agreement with the Trust.

The Polen Opportunistic High Yield Fund commenced investment operations on July 24, 2023. Prior to that date, this Fund acquired the assets and assumed the liabilities of the Polen DDJ Opportunistic High Yield Fund (the “Predecessor Fund”), a series of ALPS Series Trust (“ALPS”), in a tax-free reorganization as set out in an Agreement and Plan of Reorganization, dated as of April 17, 2023 (the “Plan”). The Predecessor Fund commenced investment operations on July 16, 2015. The Plan was approved by the Trust’s Board of Trustees on February 27, 2023, by the Board of Trustees of ALPS on February 16, 2023, and by the beneficial owners of the Predecessor Fund on July 5, 2023. The tax-free reorganization was accomplished on July 24, 2023. Financial information included for the dates prior to the reorganization is that of the Predecessor Fund.

The Funds are investment companies and follow accounting and reporting guidance in the Financial Accounting Standards Board Accounting Standards Codification Topic 946.

**Portfolio Valuation** — The Funds’ net asset value (“NAV”) is calculated once daily at the close of regular trading hours on the New York Stock Exchange (“NYSE”) (typically 4:00 p.m. Eastern time) on each day the NYSE is open. Securities held by the Funds are valued using the closing price or the last sale price on a national securities exchange or the National Association of Securities Dealers Automatic Quotation System (“NASDAQ”) market system where they are primarily traded. Equity securities traded in the over-the-counter (“OTC”) market are valued at their closing prices. If there were no transactions on that day, securities traded principally on an exchange or on NASDAQ will be valued at the mean of the last bid and ask prices prior to the market close. Investments in other open-end investment companies are valued based on the NAV of the investment companies (which may use fair value pricing as discussed in their prospectuses). Securities that do not have a readily available current market value are valued in good faith by the Adviser as “valuation designee” under the oversight of the Trust’s Board of Trustees. Relying on prices supplied by pricing services or dealers or using fair valuation may result in values that are higher or lower than the values used by other investment companies and investors to price the same investments. The Adviser has adopted written policies and procedures for valuing securities and other assets in circumstances where market quotes are not readily available. In the event that market quotes are not readily available, and the security or asset cannot be valued pursuant to one of the valuation methods, the value of the security or asset will be determined in good faith by the Adviser pursuant to its policies and procedures. On a quarterly basis, the Adviser’s fair valuation determinations will be reviewed by the Trust’s Board of Trustees.

The Funds have a fundamental policy with respect to industry concentration that it will not invest 25% or more of the value of the Funds’ assets in securities of issuers in any one industry. Since inception the Funds have utilized BICS at the sub-industry level for defining industries for purposes of monitoring compliance with its industry concentration policy. However, at times, the Funds may utilize other industry classification systems such as MGECS, ICE BofA or GICS, as applicable, for other purposes.

**Fair Value Measurements** — The inputs and valuation techniques used to measure fair value of the Funds’ investments are summarized into three levels as described in the hierarchy below:

- Level 1 — quoted prices in active markets for identical securities;

# POLEN FIXED INCOME FUNDS

## Notes to Financial Statements (Continued) April 30, 2025

- Level 2 — other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.); and
- Level 3 — significant unobservable inputs (including the Funds' own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out are recognized at the value at the end of the period.

Significant events (such as movement in the U.S. securities market, or other regional and local developments) may occur between the time that foreign markets close (where the security is principally traded) and the time that each Fund calculates its NAV (generally, the close of the NYSE) which may impact the value of securities traded in these foreign markets. As a result, each Fund fair values foreign securities using an independent pricing service which considers the correlation of the trading patterns of the foreign security to the intraday trading in the U.S. markets for investments such as American Depositary Receipts, financial futures, exchange traded funds and certain indexes as well as prices for similar securities. Such fair valuations are categorized as Level 2 in the hierarchy.

Securities listed on a non-U.S. exchange are generally fair valued daily by an independent fair value pricing service approved by the Trust's Board of Trustees and categorized as Level 2 investments within the hierarchy. The fair valuations for these securities may not be the same as quoted or published prices of the securities on their primary markets. Securities for which daily fair value prices from the independent fair value pricing service are not available are generally valued at the last quoted sale price at the close of an exchange on which the security is traded and categorized as Level 1 investments within the hierarchy. Values of foreign securities, currencies, and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the exchange rate of said currencies against the U.S. dollar, as of valuation time, as provided by an independent pricing service approved by the Board of Trustees.

The valuations for fixed income securities, including corporate bonds and floating rate senior loans ("Senior Loans"), are typically the prices supplied by independent third-party pricing services, which may use market prices or broker/dealer quotations or a variety of valuation techniques and methodologies. The independent third-party pricing services use inputs that are observable such as issuer details, interest rates, yield curves, prepayment speeds, credit risks/spreads, default rates and quoted prices for similar securities. Senior Loans are fair valued based on a quoted price received from a single broker-dealer or an average of quoted prices received from multiple broker-dealers or valued relative to other benchmark securities when broker-dealer quotes are unavailable. To the extent that these inputs are observable, the fair value of fixed income securities and Senior Loans would be categorized as Level 2; otherwise the fair values would be categorized as Level 3.

The following is a summary of the inputs used, as of April 30, 2025, in valuing each Fund's investments carried at fair value:

At the end of each quarter, management evaluates the classification of Levels 1, 2 and 3 assets and liabilities. Various factors are considered, such as changes in liquidity from the prior reporting period; whether or not a broker is willing to execute at the quoted price; the depth and consistency of prices from third-party pricing services; and the existence of contemporaneous, observable trades in the market. Additionally, management evaluates the classification of Level 1 and Level 2 assets and liabilities on a quarterly basis for changes in listings or delistings on national exchanges.

Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of the Funds' investments may fluctuate from period to period. Additionally, the fair value of investments may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values the Funds may ultimately realize. Further, such investments may be subject to legal and other restrictions on resale or otherwise less liquid than publicly traded securities.

For fair valuations using significant unobservable inputs, U.S. generally accepted accounting principles ("U.S. GAAP") require the Funds to present a reconciliation of the beginning to ending balances for reported market values that present changes attributable to

# POLEN FIXED INCOME FUNDS

## Notes to Financial Statements (Continued) April 30, 2025

total realized and unrealized gains or losses, purchase and sales, and transfers in and out of Level 3 during the period. A reconciliation of Level 3 investments is presented only when the Funds have an amount of Level 3 investments at the end of the reporting period that was meaningful in relation to their net assets. The amounts and reasons for all transfers in and out of Level 3 are disclosed when the Funds had an amount of transfers during the reporting period that was meaningful in relation to their net assets as of the end of the reporting period.

There are significant unobservable inputs used in the fair value measurement of the Funds' Level 3 investments. Generally, a change in the assumptions used in any input in isolation may be accompanied by a change in another input. Significant changes in any of the unobservable inputs may significantly impact the fair value measurement. The impact is based on the relationship between each unobservable input and the fair value measurement.

**Use of Estimates** — The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes at the date of the financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates and those differences could be material.

**Investment Transactions, Investment Income and Expenses** — Investment transactions are recorded on trade date for financial statement preparation purposes. Realized gains and losses on investments sold are recorded on the identified cost basis. Interest income is recorded on the accrual basis. Dividends are recorded on the ex-dividend date. Distribution (12b-1) fees relating to a specific class are charged directly to that class. Fund level expenses common to all classes, investment income and realized and unrealized gains and losses on investments are generally allocated to each class of each Fund based upon the relative daily net assets of each class of each Fund. The Funds may also be subject to foreign taxes on income, a portion of which may be recoverable. The Funds apply for refunds where available. The Funds will accrue such taxes and reclaims, as applicable, based upon the current interpretation of tax rules and regulations that exist in the market in which the Fund invests. General expenses of the Trust are generally allocated to each Fund under methodologies approved by the Board of Trustees. Expenses directly attributable to a particular Fund in the Trust are charged directly to that Fund. The Funds' investment income, expenses (other than class-specific expenses) and unrealized and realized gains and losses are allocated daily to each class of shares based upon the relative proportion of net assets of each class at the beginning of the day.

**Cash and Cash Equivalents** — Cash and cash equivalents include cash and overnight investments in interest-bearing demand deposits with a financial institution with original maturities of three months or less. Each Fund maintains deposits with a high quality financial institution in an amount that is in excess of federally insured limits.

**Dividends and Distributions to Shareholders** — Dividends from net investment income and distributions from net realized capital gains, if any, are declared and paid to shareholders and are recorded on ex-date. Income dividends and capital gain distributions are determined in accordance with U.S. federal income tax regulations, which may differ from U.S. GAAP.

**U.S. Tax Status** — No provision is made for U.S. income taxes as it is each Fund's intention to continue to qualify for and elect the tax treatment applicable to regulated investment companies under Subchapter M of the Internal Revenue Code of 1986, as amended, and make the requisite distributions to its shareholders which will be sufficient to relieve it from U.S. income and excise taxes.

**Other** — In the normal course of business, the Funds may enter into contracts that provide general indemnifications. The Funds' maximum exposure under these arrangements is dependent on claims that may be made against the Funds in the future, and therefore, cannot be estimated; however, based on experience, the risk of material loss for such claims is considered remote.

**Debt Investment Risk** — Debt investments are affected primarily by the financial condition of the companies or other entities that have issued them and by changes in interest rates. There is a risk that an issuer of a Fund's debt investments may not be able to meet its financial obligations (e. g., may not be able to make principal and/or interest payments when they are due or otherwise default on other financial terms) and/or seek bankruptcy protection. Securities such as high-yield bonds, e.g., bonds with low credit ratings by Moody's (Ba or lower) or Standard & Poor's (BB and lower) or if unrated are of comparable quality as determined by the Adviser, are especially subject to credit risk during periods of economic uncertainty or during economic downturns and are more likely to default on their interest and/or principal payments than higher rated securities. Debt investments may be affected by changes in interest rates.

# POLEN FIXED INCOME FUNDS

## Notes to Financial Statements (Continued) April 30, 2025

Debt investments with longer durations tend to be more sensitive to changes in interest rates, making them more volatile than debt investments with shorter durations or floating or adjustable interest rates. The value of debt investments may fall when interest rates rise.

**Senior Loans** — Certain Funds invests primarily in senior loans and other floating rate investments. Senior loans typically are rated below investment grade. Below investment grade securities, including senior loans, involve greater risk of loss, are subject to greater price volatility, and may be less liquid and more difficult to value, especially during periods of economic uncertainty or change, than higher rated debt securities. Market quotations for these securities may be volatile and/or subject to large spreads between bid and ask prices. These securities once sold, may not settle for an extended period (for example, several weeks or even longer). A Fund will not receive its sale proceeds until that time, which may constrain a Fund's ability to meet its obligations. A Fund may invest in securities of issuers that are in default or that are in bankruptcy. The value of collateral, if any, securing a senior loan can decline or may be insufficient to meet the issuer's obligations or may be difficult to liquidate. No active trading market may exist for many senior loans, and many loans are subject to restrictions on resale. Any secondary market may be subject to irregular trading activity and extended settlement periods. There is less readily available, reliable information about most senior loans than is the case for many other types of securities. Loans may not be considered "securities," and purchasers, such as a Fund, therefore may not be entitled to rely on the anti-fraud protections afforded by federal securities laws.

**Recent Accounting Pronouncement** — The Funds adopted Financial Accounting Standards Board Update 2023-07, Segment Reporting (Topic 280) – Improvements to Reportable Segment Disclosures during the year. Each Fund's adoption of the new standard impacted financial statement disclosures only and did not affect the Fund's financial position or results of operations. Each Fund operates as a single reporting entity, meaning all its business activities are considered one business segment for financial reporting purposes.

The Chief Operating Decision Maker ("CODM") is the Adviser and the Principal Executive Officer ("PEO") and Principal Financial Officer ("PFO") of each Fund. The CODM has concluded that each Fund operates as a single operating segment since each Fund has a single investment strategy as disclosed in its prospectus, against which the CODM assesses performance. The financial information provided to and reviewed by the CODM is presented within each Fund's financial statements.

**Restricted Securities** — Restricted securities are securities that may only be resold upon registration under federal securities laws or in transactions exempt from such registration. In some cases, the issuer of restricted securities has agreed to register such securities for resale, at the issuer's expense, either upon demand by a fund or in connection with another registered offering of the securities. Many restricted securities may be resold in the secondary market in transactions exempt from registration. Such restricted securities may be determined to be liquid. The Fund will not incur any registration costs upon such resale. The Fund's restricted securities are valued at the price provided by pricing services or dealers in the secondary market or, if no market prices are available, at the fair value price as determined by the Fund's adviser pursuant to the Fund's fair value policy, subject to oversight by the Board of Trustees. The Fund has acquired certain securities, the sale of which is restricted under applicable provisions of the Securities Act of 1933. It is possible that the fair value price may differ significantly from the amount that may ultimately be realized in the near term, and the difference could be material.

### 5. Federal Tax Information

The Funds have followed the authoritative guidance on accounting for and disclosure of uncertainty in tax positions, which requires the Funds to determine whether a tax position is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Tax positions not deemed to meet the more-likely-than-not threshold would be recorded as tax benefit or expense in the current year. Each Fund has determined that there was no effect on the financial statements from following this authoritative guidance. In the normal course of business, the Funds are subject to examination by federal, state and local jurisdictions, where applicable, for tax years for which applicable statutes of limitations have not expired.

Distributions are determined in accordance with federal income tax regulations, which may differ in amount or character from net investment income and realized gains for financial reporting purposes. Accordingly, the character of distributions and composition of net assets for tax purposes may differ from those reflected in the accompanying financial statements. To the extent these differences are permanent, such amounts are reclassified within the components of net assets based on the tax treatment; temporary differences do not require reclassifications. These temporary differences are primarily due to tax adjustments on defaulted bonds,

# POLEN FIXED INCOME FUNDS

## Notes to Financial Statements (Continued) April 30, 2025

discount/premium adjustments, capital loss carryforwards, and losses deferred due to wash sales. Net assets were not affected by these adjustments. For the year ended April 30, 2025, there were no reclassifications for the Funds.

The tax character of distributions paid by the Funds during the year ended April 30, 2025, were as follows:

	<u>Ordinary Income Dividend</u>	<u>Long-Term Capital Gain Dividend</u>	<u>Total Distributions Paid</u>
Polen U.S. High Yield Fund . . . . .	\$ 234,412	\$—	\$ 234,412
Polen Opportunistic High Yield Fund . . . . .	24,263,351	—	24,263,351

The tax character of distributions paid by the Funds during the year ended April 30, 2024, were as follows:

	<u>Ordinary Income Dividend</u>	<u>Total Distributions Paid*</u>
Polen U.S. High Yield Fund . . . . .	\$ 205,853	\$ 205,853
Polen Opportunistic High Yield Fund . . . . .	13,936,725	13,936,725

\* Distributions will not tie to Statements of Changes in Net Assets because distributions are recognized when actually paid for tax purposes.

As of April 30, 2025, the components of distributable earnings on a tax basis were as follows:

	<u>Capital Loss Carryforward</u>	<u>Undistributed Ordinary Income</u>	<u>Unrealized Appreciation/ (Depreciation)</u>	<u>Temporary Differences</u>
Polen U.S. High Yield Fund . . . . .	\$ (20,281)	\$ 3,885	\$ (798)	\$ —
Polen Opportunistic High Yield Fund . . . . .	(35,704,015)	160,639	(12,654,396)	(245,627)

The tax character of distributions paid by the Funds during the year ended April 30, 2025, were as follows:

The differences between the book and tax basis components of distributable earnings relate primarily to the timing and recognition of income and gains for federal income tax purposes. Foreign currency and short-term capital gains are reported as ordinary income for federal income tax purposes.

As of April 30, 2025, the federal tax cost, aggregate gross unrealized appreciation and depreciation of securities held by each Fund were as follows:

	<u>Federal Tax Cost</u>	<u>Unrealized Appreciation</u>	<u>Unrealized (Depreciation)</u>	<u>Net Unrealized (Depreciation)</u>
Polen U.S. High Yield Fund . . . . .	\$ 2,442,382	\$ 49,684	\$ (50,482)	\$ (798)

## Notes to Financial Statements (Continued) April 30, 2025

Pursuant to federal income tax rules applicable to regulated investment companies, the Funds may elect to treat certain capital losses between November 1 and April 30 and late year ordinary losses ((i) ordinary losses between January 1 and April 30, and (ii) specified ordinary and currency losses between November 1 and April 30) as occurring on the first day of the following tax year. For the year ended April 30, 2025, any amount of losses elected within the tax return will not be recognized for federal income tax purposes until May 1, 2025. For the year ended April 30, 2025, the Funds did not have late year ordinary loss deferrals and capital loss deferrals.

Accumulated capital losses represent capital loss carryforwards as of April 30, 2025 that may be available to offset future realized capital gains and thereby reduce future capital gains distributions. As of April 30, 2025, the Funds' capital loss carryforward, which were comprised of both short-term losses and long-term losses, and had an unlimited period of capital loss carryover were as follows:

	<b>Capital Loss Carryforward</b>	
	<b>Short-Term</b>	<b>Long-Term</b>

Polen Opportunistic High Yield Fund . . . . .	5,484,592	30,219,423

For the year ended April 30, 2025, the following Funds utilized capital losses as follows:

	<b>Capital Losses Utilized</b>
Polen U.S. High Yield Fund . . . . .	\$ 29,062
Polen Opportunistic High Yield Fund . . . . .	1,427,680

### 6. Commitments and Contingencies

Some Funds may make commitments pursuant to bridge loan facilities. Bridge loan commitments may obligate the Funds to furnish temporary financing to a borrower until permanent financing can be arranged. Such commitments typically remain off balance sheet as it is more likely than not, based on the good faith judgement of the Adviser, that such bridge facilities will not ever fund. As of April 30, 2025, there were no outstanding bridge facility commitments.

**Unfunded Loan Commitments** — Certain Funds may enter into unfunded loan commitments. Unfunded loan commitments may be partially or wholly unfunded. During the contractual period, the Fund is obliged to provide funding to the borrower upon demand. A fee is earned by a Fund on the unfunded loan commitment and is recorded as interest income on the Statement of Operations. Unfunded loan commitments on senior loan participations and assignments, if any, are marked to market daily and valued according to the Trust's valuation policies and procedures. Any applicable net unrealized appreciation or depreciation at the end of the reporting period is recorded as an asset and any change in net unrealized appreciation or depreciation for the reporting period is recorded within the change in net unrealized appreciation or depreciation on investments. Unfunded loan commitments are included in the Portfolio of Investments. As of April 30, 2025, neither fund had any unfunded loan commitments.

### 7. Subsequent Events

Management has evaluated the impact of all subsequent events on each Fund through the date the financial statements were issued, and has determined that there was the following subsequent event:

On April 29, 2025, the Board approved a plan to liquidate and terminate Polen U.S. High Yield Fund, which occurred on May 15, 2025.

Management has evaluated and has determined there are no additional subsequent events.

Because the Funds' fiscal year is not the calendar year, another notification will be sent with respect to calendar year 2025. The second notification, which will reflect the amount, if any, to be used by calendar year taxpayers on their U.S. federal income tax returns, will be made in conjunction with Form 1099-DIV and will be mailed in January 2026.

Foreign shareholders will generally be subject to U.S. withholding tax on the amount of their ordinary income dividends. They will generally not be entitled to a foreign tax credit or deduction for the withholding taxes paid by the Funds, if any.

In general, dividends received by tax-exempt recipients (e.g., IRAs and Keoghs) need not be reported as taxable income for U.S. federal income tax purposes. However, some retirement trusts (e.g., corporate, Keogh and 403(b)(7) plans) may need this information for their annual information reporting.

Shareholders are advised to consult their own tax advisers with respect to the tax consequences of their investment in the Funds.
